

Teachers Training Workshop

Belgrade, June 16-17, 2022

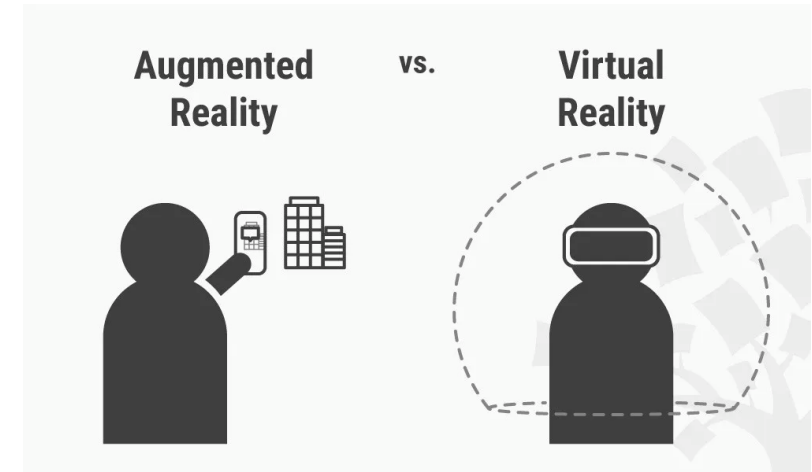

Session 3: Application and impacts

Urban Project scenarios: development of design alternatives for a sustainable, resilient, and inclusive urban regeneration - supported by Virtual and Augmented Reality

George Artopoulos, Salvatore Carlucci, Ioanna Kyprianou

What is Virtual Reality and its difference to Augmented Reality?

- Virtual Reality (VR) is the use of computer technology to create a simulated environment;
- VR technology places the user in space through immersive experiences. Instead of viewing a screen in front of them, users are immersed and able to interact with 3D worlds;
- AR—You design for digital elements to appear over real-world views, sometimes with limited interactivity between them, often via smartphones. Examples include Apple's ARKit and Android's ARCore (developer kits), the Pokémon Go game;
- VR—You design immersive experiences that isolate users from the real world, typically via headset devices. Examples include Oculus and Google Cardboard, where users can explore a city or an archaeological site using headset-mounted smartphones.

National Initiatives for Open Science in Europe – H2020 Research and Innovation action – contract no. 857645

1_ Use of VR for interaction among authorities, local stakeholders & communities

Planned

Future

1. Roccas bastion
 2. Medieval walls cut (British period), 1879
 3. Spitfire coffee shop
 4. Catholic church of Nicosia
 5. UN control
 6. Kastellotisa hall
 7. Government offices (British period)
 8. Irrigation channel
 9. Stone bridge (Gothic period)
 10. Ribvault key stone
 11. Kionisc
 - 12, 13, 14. Foundations of Arab Ahmet acqqueduct
 15. Pebbled walkway (Ottoman period)
 16. Canon ball
 17. Venetian walls (original height)
 18. Foundations
 19. Pebbled walkway (British period)
 20. Gate wooden doors (late British period)
 21. Medieval sewage system remains
 22. Foundations of Arab Ahmet acqqueduct
 23. Gravestones in secondary use
 24. Police HQ (British period)
 25. Emblem of Mahmut pasha
 26. Medieval sewage system remains
 - 27, 28. Ramps
- Points of Interest**
Gate San Domenico (Paphos Gate)

Walking platform (the result of co-design through VR) currently under construction on site in Nicosia

II Use of AR / mobile apps for community building actions, and the collection, curation and delivery of humanities open data, Including the FAIRification of data.
